

COMMERCIAL STACK WASHER/DRYER

Huebsch® stack washer/dryers are easy to install and offer all the innovative features of standard machines while only taking up half of the floor space, adding flexibility to your laundry design. More powerful than ever, and loaded with game-changing technology, the new front load washer is designed to deliver laundry performance that is second to none. Stacked on top is a commercial dryer that has been durably constructed and extensively tested to ensure optimal performance.

CUTTING-EDGE BALANCING TECHNOLOGY

An updated suspension and new sensing technologies powerfully combine to redistribute loads and maintain cycle times — resulting in less utility costs and shorter wait times.

INCREDIBLE 440 G-FORCE

Increased spin speed exerts high G-Force to maximize moisture removal and lower drying times, getting customers in and out of your store faster and ensuring they leave satisfied.

FAST DRYING TIMES

Huebsch dryers offer a 7.0 cu. ft. cylinder with an 18 lb capacity offers ample space for large loads to tumble and produce fast drying times, while lowering utility consumption.

SPACE SAVINGS

A stack washer/dryer gives your laundry all the benefits of a stand-alone washer and dryer pair in the space of one machine. The stack utilizes all the same connections as a standard washer and dryer, so there are no special hookups required.

UNMATCHED DURABILITY

Our commercial stack washer/dryer is manufactured at our Ripon, WI headquarters. The entire machine receives Huebsch's standard one-year warranty. In addition, Huebsch has more service representatives in the field than most brands have in their whole organization.

*Parts only, labor not included. See Huebsch Warranty Bond for specifics.

ELECTRONIC HOMESTYLE CONTROL

The Electronic Homestyle Control features a time-remaining display, six preset cycle buttons for both the washer and dryer, cycle adjustability, additional wash cycle options, cycle status indicator lights and moisture level indicator lights on the dryer.
