Huebsch is the answer.

Anybody can sell you laundry equipment and discuss the merits of each nut and bolt. However, at Huebsch, our priority is answering your questions about how working with us will make your business easier to run and more profitable.

Customers have selected Huebsch products for their ease of use, supreme durability and because owning a Huebsch product brings a service and support network that’s unmatched within the industry. For profitability, reliability and ease of use, Huebsch is the answer.

Keeping It Green

What makes these Huebsch machines green to save my operation some green?

Low water use.
Huebsch front load washers offer owners a Water Saver Cycle that averages just 10.4 gallons of water per cycle. Low water use makes this Huebsch machine the perfect replacement for water guzzling top load washers. Best of all, the washer is so efficient it’s earned an ENERGY STAR® rating.

High spin speed.
With a final spin of 1,000 RPM, Huebsch front load washers exert 300 G-Force on loads to remove more water. This is the same G-Force many top-of-the-line large capacity washer-extractors exert in commercial laundry applications. The end results are greatly reduced drying times for customers and lower utility consumption for store owners.

Fast drying times.
Huebsch’s matching dryer delivers fast drying results that complement the front load washer’s performance. A 7.0 cu. ft. cylinder with an 18 lb capacity offers ample space for large loads to tumble and produce fast drying times.

Quality You Can Touch

I want equipment that sets my store apart and portrays a quality operation. What do Huebsch washers and dryers bring to the table to convey my message?

Stainless steel inside and out.
Huebsch front load washers feature stainless steel inner and outer tubs that are durable and will stay looking good for years.

Large, rugged doors.
Our washer’s large 188.6 sq. in. door opening is a hit with customers, as it speeds the often awkward and time-consuming tasks of loading and unloading. In addition, the solid door features a durable piano style, steel hinge. Likewise, the dryer also has a rugged door and hinge with the industry’s largest door opening, 2.06 sq. ft.

Convenience.
A frontmount supply dispenser automatically adds detergent, bleach and softener for customer convenience.

Keeping control of quality.
Huebsch front load washers and dryers with a Micro-Display Control offer a time-remaining countdown, coin countdown and cycle status lights. Electro-mechanical control models offer basic wash and dry options and are simple to operate.

Space Savings

My laundry is short on space, how can I add washing and drying capacity?

Huebsch space savers.
A stack washer/dryer gives your vended laundry all the benefits of a stand-alone washer and dryer pair in the space of one machine. The stack utilizes all the same connections as standard washer and dryers, so there’s no special hookups required.

Unmatched Durability

I’m investing a large sum in my coin laundry, and want peace of mind my equipment will last well into the future. What sets Huebsch apart in terms of reliability?

Rugged inside and out.
Huebsch’s front load washer boasts a rugged design, including a cast aluminum trunnion and bearing housing as well as four heavy-duty shock absorbers.

Heavy duty power.
Our front load washer is powered by a heavy-duty 1 horsepower motor, while Huebsch dryers feature a 1/3 horsepower commercial quality motor.

Versatility.
For customers not replacing conventional top load washers, gravity drain (drain valve) models are available.

Not just standing behind our equipment, but standing beside you and your business.
Our made-in-America product comes with an industry-leading bond. The entire machine receives Huebsch’s standard three-year warranty. In addition, Huebsch has more service representatives in the field than most brands have in their whole organization.

Huebsch support is further bolstered by an online component and a help line that takes 10,000 calls per year.

*Parts only, labor not included. See Huebsch Warranty Bond for specifics.
Keeping It Green

What makes these Huebsch machines green to save my operation some green?

- **Low water use.** Huebsch front load washers offer owners a Water Saver Cycle that averages just 10.4 gallons of water per cycle. Low water use makes this Huebsch machine the perfect replacement for water guzzling top load washers. Best of all, the washer is so efficient it’s earned an ENERGY STAR® rating.
